

Functionality should never compromise beautiful design. Re-Bath's complete bathroom remodeling solution gives you the style you want at the budget you need. We cover the entire process—from start to stunning—in four easy steps.

## 1 In-Home Consultation

Our Design Consultant brings the (real or virtual) showroom to your home and listens carefully to your needs and wants.

**Before.**  
View our online Design Gallery for inspiration.

**During.**  
Our Design Consultant views and measures your space, then shares ideas for transforming your bathroom into the perfect space of your dreams.

**Next.**  
You'll receive a no-obligation quote.

### Pro Tip:

Share your needs and wants with your Design Consultant.  
How is your bathroom used?  
How well does it function?  
What do you need that your bathroom doesn't currently offer?

## 2 Free Custom Design

Our design styles—traditional, transitional, rustic and contemporary—are building blocks to help you imagine your dream space.

**Before.**  
Gather photos or Pinterest boards of color combinations, materials, and products you love for inspiration.

**During.**  
Our Design Consultant helps you select your products, materials, finishes, and colors, and coordinate it all to create a beautiful bathroom within your budget.

**Next.**  
Your Design Consultant will order all the elements for your bathroom remodel.

### Pro Tip:

Consider adding a focal point to your bathroom remodel. The smaller footprint might allow more room in your budget to upgrade the tile, flooring, or fixtures.

## 3 Removal & Preparation

Once your products have been ordered, it's time for the removal process to begin.

**Before.**  
Prepare your home by removing all personal items (soaps, bottles, towels, etc.) from the tub and shower area and clearing the vanity. Remove knick-knacks, picture frames, and small furniture from the bathroom, as well as along the path to the bathroom.

**During.**  
For safety, please keep children and pets away from the tech and installation area. Keep an entrance to your home and to the bathroom clear. Our clean and courteous crew will prepare your home, and carefully remove your old bathroom. We handle all the necessary repairs and refreshes for installation.

**Next.**  
Your bathroom is ready for installation!

### Pro Tip:

Be aware of water shut off and electric panel locations. If necessary, be sure the attic door or basement is cleared and accessible. Take a few "before" photos once the area has been cleared, so you can compare to your new bathroom!

## 4 Professional Installation

When your custom-made products have shipped, it's time to start rebuilding your beautiful new bathroom!

**Before.**  
Again, be sure the entrance to your home and bathroom are clear for our crew, and keep pets and children from the area for safety.

**During.**  
From plumbing and electrical, to tile and fixtures, our installation crew will meticulously place all your new materials as planned.

**Next.**  
Our crew will provide you with an approved cleaning products list and tips for keeping your bathroom looking like new for years to come!

### Pro Tip:

Remember to take a few "After" photos. We can't wait to see your new bathroom!
